

What do you like about your school?

This school is literally a lifesaver for my family. My daughter has Autism and struggles to be in public schools to be around crowds is overwhelming for her, communicating in big groups was just devastating for her. This school has changed her life and she is so happy and she enjoys her friends there and Loves the school! I can't say how thankful I am for it!

Great school for students with any type of learning differences for sure.

I absolutely love the school. I see my child involved with his classes as he discusses (sometimes) homework with me or he reports what he has learned. I think he is testing my knowledge. I appreciate the school working with each child's needs. I like the creative approach the school takes to teach kids what they need to know. I like that the teachers as well as Ms. Hale are involved with the children's progress and are not only accessible to the children, but also the parents without any problems. The support I receive as a parent is tremendous. The school set up I think works really well in the digital age and for this generation. Excellent communication and prompt feedback.

That fact that my son is developing good writing and thinking skills and is having fun doing it.

I love that they have a very high level of education while allowing a child to learn at their ability.

The assignments are immersive and allow for creative and critical thinking.

That the student is encouraged to be individually creative and express their individuality yet the course still retains the needed.

Highly visual and tech heavy.

I like the variety of assignments. You offer assignments that meet the needs of all the students' learning styles.

That the teachers are willing to work with my son and teach him in a way that he can have success. That it is an integrated curriculum and interactive. It is also giving my son valuable computer skills. My son has had great success with Wilostar and it has caused him to blossom and have better self-esteem.

I love that my son loves to go to school! He is motivated to learn and often I see his interest in a subject carry over into his spare time and he further educates himself on the topic. I like the teachers as I see them as fair, but tough, in the sense that they have high expectations of the students. The students are encouraged and inclined to excel based on the constructive criticism and deserved accolades they receive. I also like the responsiveness of the principal. Anytime I have had an issue be it school, or in terms of counsel, she is available and offers sound input.

We like the way integrating studies cover so many areas. We like the way we are informed of areas where our student needs to improve, catch up. We appreciate the way the teacher comments on his success. We like the way it all works out for our Aspergers grandson.

All of it...

I love the creative content and the design aspect utilized in all classes. My son has thrived in this type of environment. The WiloStar curriculum is very engaging, and I believe that this is part of the reason that my son enjoys learning.

I like that my child special needs are accommodated and that I am able to reach out and communicate with the school director and my child's teacher anytime we need. I love that he is finally learning and his gifts are being brought to the surface with this program.

It suits children from all different backgrounds. It's not a one-size-fits-all school.

Everything. The student engagement, personal goal setting, solid academic curriculum, teacher/ parent communication

I like that my child has the ability to interact with other peers and teachers in a virtual world that is safe and fun.

I like that my child is happy to start the school day and is once again excited about learning.

I like that it provides a safe environment for learning at one's own pace.

I love the creative assignments. My child is excited to tackle each day, and remains engaged throughout the year.

Flexible

Our son enjoys the format very much and is excited to go to class and do projects. Over Summer he's remarked he can't wait to go back.

Malcolm really enjoys it and the format. He hated traditional school for a variety of reasons, but he is enthusiastic about attending classes and doing projects. He has told us over the Summer that he can't wait to go back.

The way he learns, project based learning. It's worked out great for Cesar

What do you dislike?

I would like to see the live class meeting go longer because that is a favorite part.

There isn't anything I could possibly complain about. This is our fourth year with the school and we couldn't be happier.

I wish there were more families in my local area so we could get together.

I only wish I knew about it earlier.

Nothing I don't like.

Sometimes work won't upload properly, but it get resolved.

It would be great for the kids to be able to interact in real life. Being an online school unfortunately precludes this.

Parent Survey Results 2016-2017

I can honestly not say one bad word.. my child has done wonderful in this school... He was a 4.0 in public school too but we love this school..

I know my grandson(being a night owl) would like the class conferences to be early afternoon, but he has to be reminded he is in the world like others instead of others being in his world. Lol, actually, we have not found anything that cannot be worked out with the teachers.

I can't think of anything.

I like everything about the school.

Nothing

Virtual graduation. I wish they would bring back the real graduation!

This is our first year with school and thus far we have no complaints.

This is a hard one to answer as I am so happy with how much my son has learned to read and allowing him to be himself where no one can judge him I can't find a thing to say I dislike.

What are some suggestions for improvement?

The math curriculum

Would like more social activities. I know it's difficult in an online environment.

The school has students from all over so it would be nice if my daughter could see the few friends that she's made there. Of course they're far away and that's really not possible. But with that said this school still an awesome!!

The school is amazing and I love it just the way it is!

Change up the world projects a little to where the students have to do some more hands on projects outside of home possibly without taking up too much time of course.

Not sure if WiloStar offers internships, but that would be a great way for my son to try out his desired college major of digital none

Maybe more technical classes for electives.

That they offered curriculum for lower elementary levels.

I wish the school still gathered students physically for graduation.

I don't know. I like it how it is.

Offer live math classes for an additional charge.

Offer some electives on book keeping , money management, life skills, how to find out what they are interested in doing after high school, etc. that they will need to prepare them better for when they graduate and get out on their own.

Parent Survey Results 2016-2017

I would like to see geography at the middle school grades, and perhaps live teleconferencing from time to time, so the kids and teachers can put faces with names.

It would be awesome if the tower program was faster to put together, but once again that is a personal thing for Johnathan. We want to thank all at Wilostar for making his school experience a 'Great one!'

Maybe more Voice chat

We love the school the way it is. It's been a great experience for us.

I can not think of anything at this point.

If there was a way to connect with other students in our state outside of school or for fieldtrips, it would be great to have a roster? Or have the option to volunteer our information in a roster.

I can't think of anything. :-)

Keep doing a great job! We love this school.

I suggest more social gatherings over breaks.

I would like more options to choose an elective from

I'm completely satisfied

Add in more themed holiday parties.

Can't think of anything right now.

Can't think of anything at the moment.

Not sure, will get back to you if I can think of something.
